Warerooms
Fifth Avenue at Thirty-ninth Street

Note the different distances at which the various workers use their eyesight.

In the fitting of glasses for general prescriptions we consider carefully the distance at which the wearer intends to use them.

For example—a bookkeeper requires that his glasses be fitted for a longer working range than would be necessary for an engraver.

With us, every factor that bears upon the comfort and satisfactory use of the glasses is carefully considered.

It is this close attention to the seemingly unimportant details that has helped to make ours the Largest Optical House in the World.

U.S. SETS WATCH
ON WAR PLANTS
FOR ALIEN FOES

Long Search of Docks Also

Made in Campaign Against
Dangerous Germans.

Decided to send out agents who have not complied with the letter of the law regarding their possession to or near the barred zones specified in the President's proclamation; agents of the Department of Justice, directed by Capt. William M. Coffey and several of deputies on the direction of United States Marshal Thomas D. McCarthy, received their brief for unnatural Germans today.

As an aftermath of Thursday's incidents, the Federal agents concentrated their investigations on marine plants, docks and piers in the hope of finding the enemy aliens who slipped through the carefully drawn Government net on Wednesday night, and of arresting many others whose recent moves have aroused the suspicion of the Government. Additional arrests are expected hourly.

Hundreds of workmen in every kind of trade in and around the barred zones were interrogated as to the nature of their employment and their right to enter the zones. Entrances to plants engaged in the manufacture of aeroplane accessories, torpedoes and various forms of apparatus for submarine chasers were closely watched by the plain clothes

officers and friends of impressing negatives with whom they might afford to give them off. No address will be given to those who have been sent to Ellis Island, it was announced.

The theft by German spies of plans of an American invention the Government believed might have a big part in ending the war was rumored today to have been one cause of the unusual activity during their period of detention were received at Federal headquarters. A large number asked inquiries that they might attend to other personal matters. All those appear were denied, as the Government, without all responsibility in such cases so long as a period of war exists.

Offices are devoids of impressing negatives with whom they might afford to give them off. No address will be given to those who have been sent to Ellis Island, it was announced.

According to the story, many of the prisoners were employed in the factory where the mechanical secret was being worked out. The Federal authorities discovered that plans and even finished parts of the newly invented engine of destruction had been stolen and said, and decided to act immediately.

Land prices in Brooklyn are now at rock bottom. The cost of building never was higher. When peace returns this condition will be reversed.

You win if you buy NOW when land is cheap and build THEN when materials are cheaper.

To enable you to do this, and to stir up a dull market, we will for a limited time, contract to build houses at cost for all who buy our land at present low prices and on our very easy terms—\$10 down and \$10 monthly—when your payments aggregate 15 per cent. of the actual cost of the house.

This means a home of your own—built to suit you—at the lowest possible cost.

QUICK-HANDY-LASTING

Bevo

BEVERAGE

—the home drink

Besides its popularity at drug stores, fountains and restaurants, Bevo has found a welcome place in the home. A family beverage—a guest offering—a table drink that goes perfectly with all food.

As a suggestion for Sunday supper—Sweet red or green peppers stuffed with cream cheese and chopped nuts or olives, served on lettuce leaves.

French dressing. Cold meat. Toasted crackers.

Bevo for everyone. A beverage that tastes like no other soft drink. Pure, wholesome and nutritious.

Bevo—the all-year-round soft drink.

Sold in bottles only and bottled exclusively by ANHEUSER-BUSCH—ST. LOUIS

THE NEW YORK WORLD
SETS THE PACE

Daylight was observed in the early hours of yesterday morning. The sun rose over the ocean, illuminating the sky with a golden glow. The water was calm, and the air was clear. The sun's rays reflected off the surface of the water, creating a shimmering effect. The sky was a pale yellow color, and the clouds were wispy and scattered. The overall atmosphere was peaceful and serene.

SHIPS TURNED BACK AT SEA TO SAVE CAPTAIN'S LIFE

Skipped Motion of the Zulu Taken
Ill and Is Hurled to Hospital
in New York.

The West African steamer, Zulu, en route to an African port from Europe, was taken ill and was unable to proceed. The ship was turned back to New York, where it was met and made to the pier of the American Hospital, where it was laid up.

A doctor on board the ship said that the crew had been exposed to the effects of the sun and had suffered from heat stroke. The ship was turned back to New York, where it was laid up.
